

My son Weston was born on Groundhog's Day, Feb. 2nd, 1998; and his sister Emily was born on Sept. 14th, 1999. Both were born PERFECT with ZERO issues! Both suffered permanent and irreversible neurological damage from childhood vaccinations.

Weston is now 23 and intellectually functions at a 3-4 year old level and is deaf. Emily is now 21 and functions at a 7-8 year old level. Both require 24/7 care... and will for the rest of their lives.

Please **INVESTIGATE BEFORE YOU VACCINATE!** Don't listen to doctors and governments who make **BILLIONS** telling you "*vaccines are safe and effective!*"
