

00:00:03:29 - 00:00:42:09

Greg Wyatt

So it's a beautiful day here in Phoenix, Arizona. Got a lot to talk about. I figured I'd do it in this hot tub, holding my phone in my right hand and my notes, which I have notes in my left. Here's. Here's where I'm at. I'm so blessed in some ways. This is my wife's house that we use for events, special needs events that full blast beyond comprehend.

00:00:42:13 - 00:01:08:24

Greg Wyatt

And my friends, when it comes to this health wise, it's a whole nother story. So I figured I'd just start doing one of these a day as I got a lot on my mind. And as long as I don't drop my phone, I'll be fine. Anyway, I appreciate each and every one of you your support throughout these difficult and challenging years.

00:01:09:18 - 00:01:37:18

Greg Wyatt

Being a warrior for truth, not half truths. Defuzing the great virus lie and changing the world now. But anyway, I'm going to lay back here a little bit. It's going to be 100 degrees here in Phenix today, which is really the first day that it's been 100 since October. We're getting into the warm season and we'll see it.

00:01:37:27 - 00:02:20:23

Greg Wyatt

118 120 I can handle 105, maybe 110. But after that, you're best just to shelter in place. I don't know if this is running. I hope it is. I can't see. Oh, no, it's running. It's running. Okay, so as you know, I'm pulling out the plugs on many different things. One is new Web sites based on my never ending research specifically of the last five years, when I found out the truth about certain people I won't get into.

00:02:21:17 - 00:02:52:07

Greg Wyatt

But I got Greg Wired.com, which is a complete idiot, but it has all my links there. How to get a hold of me all my different ways that I put the truth out and its full truth, not half truth. GregWyatt.net GregWyatt.com Delbigtreeexposed.com RFKjr.com RFKJrexposed.com.

00:02:52:07 - 00:03:32:22

Greg Wyatt

By the way somebody already put in RFK.com web website up which has got some interesting stuff on it but it won't go there. So I hired a full time assistant for my website development and just helping me out with my research and he works full time and I can't really afford. It's fairly expensive to do this, you know, with your websites, your domains.

00:03:32:22 - 00:04:03:18

Greg Wyatt

And then this gentleman who is graciously charging me a fraction of what a normal web developer and a research assistant would charge me. I've tried hiring people in

the past, and I just don't have that kind of money based on 40 to 50 hours a week, which I have the work to do, and I spend 40 to 50 hours a week developing all this content.

00:04:03:18 - 00:04:33:18

Greg Wyatt

My stories being on Facebook, on Telegram and all that, said GregWyatt.com. So we're going to talk about some really important things that you need to be aware of. We're going to start with Jeff Bezos. 1995 was a big year. That's when he started Amazon. And Amazon is based on artificial intelligence algorithms and controlling your mind.

00:04:34:17 - 00:05:22:23

Greg Wyatt

He is one of the big principles behind this 15 minute city push 2030 Agenda 2030. I spoke out on Agenda 2020 healthy people back in 16, 17, 18, 19 and I thought more people would get it. But there's a lot more people now getting it than there ever has been. As you know, Bezos started out selling books in 1995 and put out a lot of small booksellers out of business, and that caught me by surprise in a way, in a way, not offering free shipping.

00:05:23:13 - 00:05:54:02

Greg Wyatt

Let's let's just go fast forward to 20, 23. I mean, I order everything off Amazon. It's so convenient. I'm in the complete dependance on Amazon because I buy a lot of stuff. I mean, I buy a lot of stuff and it's so convenient and that's what life is based on. You can promote your half lives by convenience, just like this phone.

00:05:54:24 - 00:06:21:03

Greg Wyatt

Google is so convenient. All these pictures I've taken of Weston and Emily over the years are on. My Google photos are amazing. A lot of warm memories. And what happens when you look back at the past? It makes you it enables you to see the future more clearly. If you never look back at the past. Your roadmap of the past.

00:06:21:03 - 00:06:52:28

Greg Wyatt

You have no roadmap for the future. Always remember that. So back to Amazon.com. The government is sponsoring Amazon. They're bigger almost now or will be than the postal U.S. Postal Service. And up until a year or two ago, the post office hated Amazon because they didn't have their fleet of of thousands and thousands of vehicles. Emily loves Amazon, and every time she sees an Amazon truck, she starts counting it.

00:06:52:28 - 00:07:21:28

Greg Wyatt

And on the way back to Prescott, I think we've seen 40 trucks there. They're more prevalent almost in 5G towers, which I spoke a lot in the past. 5G, I'm holding it right here in my hand and I'm holding it away from my head. But it doesn't really matter. You're radiating your bright brain and has some profound effects, but that's

just part of my what I have to do.

00:07:21:28 - 00:07:55:02

Greg Wyatt

I can't get around it and that's just the way it is. So anyway, let's talk about Elon Musk. Elon Musk is another big house truther that the minions follow worshipping him, but he's a fraud. He's financing the demise of the combustion engine so he can sell his fraudulent electric cars that you'll be able to have in your garage, in your 15 minute city residence.

00:07:55:18 - 00:08:21:09

Greg Wyatt

And one thing nice about Elon Musk is he is is so in your face, if you can't see it, if you haven't noticed, you know, he wants to explore outer space. He wants to land on the moon. He wants to put all these space stations up there. But what's interesting, every rocket lately, anyway, they can't even make it out of the atmosphere without blowing up.

00:08:21:29 - 00:08:52:03

Greg Wyatt

So all that free shipping that he's giving you, that's not free. It's government sponsored. And it's just a big money laundering scheme. When you get that big and you accomplish what he accomplishes, you know that It's crazy. Anyway, as you know, the hydrogen and cars have been created. The guy that created a car that could run on water and you can look this up on YouTube, he was murdered.

00:08:52:09 - 00:09:21:05

Greg Wyatt

He went to the big three or the big four or whatever. And your cars, there's actually combustion engines that run on water, but there's no money in water, of course, unless you live in Arizona. And that's another story. We're running out of water here. They're raising our rates 25% in the next three years. I'm not kidding. You, 25%.

00:09:21:18 - 00:09:50:09

Greg Wyatt

And here in Anthem, Arizona, we get our water trucked in. I fully expect that Anthem Arizona at some point, not in my lifetime, but is going to be crusty and the generated city void of people as they move to the 15 minute cities where you can get water free, you can get three square meals of GMO crickets or whatever they want to serve you.

00:09:50:28 - 00:10:17:19

Greg Wyatt

You can get free wi fi, you can get free streaming of all the sports events and all your stars that you worship. They used to charge you \$300 a ticket. It'll be for free and you'll be happy owning nothing. So what happened to Bill Gates? Is population reduction plan another half truth or. Well, he's more just a full liar.

00:10:19:04 - 00:10:46:22

Greg Wyatt

He was a lot involved with the COVID as far as the promotion and the mindless manipulation of reality, that was actually a falsehood. And Bill Gates, his dad, as you know, was one of the principal at Planned Parenthood population reduction designed to eliminate the black race. And how do I know about all this Planned Parenthood and eugenics stuff?

00:10:47:03 - 00:11:12:29

Greg Wyatt

I found out about it like 20 years ago when I found out my dad was sterilized and I started going down to the library, going through the Rolodexes and looking up the information myself, copying it verbatim on a piece of paper on index cards, which I still have most of in my vast array of files of truth and shocked.

00:11:12:29 - 00:11:39:14

Greg Wyatt

I remember in 83 when I found out I was conceived out of the eugenics movement, my father was sterilized by the United States government. I was shocked. I mean, it tore up my mind for a long time. And people have said, Greg, your your story is kind of like a Stephen King novel. And I would like to say I probably agree with that, unfortunately.

00:11:39:14 - 00:12:15:02

Greg Wyatt

But I'm still here. I'm going to be 68 years old and like a couple of months, eight weeks, and I've had a really great, exciting life. However, the last couple of years, the last decade has been extremely, extremely challenging and especially the last couple of months. So anyway, as you know, how did I get this way? Well, God gave me an extra dose of being intuitive and my curses, my blessing, my blessing is my curse.

00:12:15:17 - 00:12:51:01

Greg Wyatt

But being an intuitive in many, many situations, if not all, has been extremely challenging and it has resulted in a lot of pain, suffering and turmoil. But God never gives you more than you can handle. But there's been many times that I've wondered if perhaps that's not the case. So anyway, as you know, Bill Gates was doing these population reduction vaccines all over the world for a long time.

00:12:51:01 - 00:13:24:02

Greg Wyatt

And in Africa, if you remember some of these countries, these poor countries where he's trying to eliminate the black people by, you know, jabbing them to insanity, it showed people jumping out of their windows in their high rises to avoid getting the you know what? So let's talk about COVID real quick. COVID is simply a CDC created bio weapon, chemical weapon.

00:13:24:03 - 00:13:56:09

Greg Wyatt

If you know anything about the CDC, they were founded in the forties and that's what

they did. They were a chemical manufacturer. And don't ask me about this stuff because they lie about everything. Ask me, I know way too much these these COVID shots or COVID, all this whole thing is one of the ways that they disperse. This is by aerosol.

00:13:57:03 - 00:14:28:26

Greg Wyatt

And the government has patents right now. It's a clear blue sky. I think I'll just leave it up there for a while. Rest my arm. But there's not a chem trail in the sky today. How about in your area? And then, of course, we have the the delayed effect of the COVID virus with the NRA or whatever you call it, which is massively shedding and getting people sick that never even got the shot.

00:14:29:15 - 00:15:00:23

Greg Wyatt

It got me. What's wrong with me? I don't know. For those of you that don't know, in 2019, Joyce's last big vacation, she went on a two week cruise and got on the ship and within 12 hours got sicker than she'd ever been in her life and spent the next ten days or so in her cabin isolated. And this is before people even knew about the quote unquote COVID.

00:15:01:25 - 00:15:31:20

Greg Wyatt

Well, she was one of the first ones. And that's what alerted me in 2020, how they were dispersing this through, closed cabins, through airplanes, within the airplane, outside the airplane. And let's talk about that. Let's talk about mortality. I'll move on. I want to talk about some things interesting and just keep it going. The new age for men's mortality in 19 and 2021.

00:15:31:20 - 00:16:06:01

Greg Wyatt

I'm in a different century. 2021 was 73, and it has been declining since then. Numbers show now it's 69 for men. It's rapidly, rapidly going down and it's only going to accelerate probably 69, 68, 65. It's just going to keep going down. And I'm talking about men and women tentatively live a couple of years longer and that's it in 1900.

00:16:06:01 - 00:16:33:08

Greg Wyatt

For those of you that didn't know the average age of of death for a male was 47 years old, I think that was for people. Actually, I'm not clear here on my notes. But in 1950 and I was born in 1955, it shot up to 68. And why? Because we got a sewer system. Our water was cleaner, our food was cleaner.

00:16:33:24 - 00:17:09:17

Greg Wyatt

People didn't bathe in their excrement. And that's what caused disease and death that lie to be exposed. Especially now when they say you need a you know what to be healthy. And they've turned that up 79 in 2000, 1977. Now these are combination numbers, 76 in 2021, and it's estimated right now to be at 69. So with that being

said, why do I do this?

00:17:09:17 - 00:17:40:06

Greg Wyatt

Well, I'm in the twilight years and I'm facing it and it's all good. I've had a great life. It's no big deal. But I'm putting my legacy online and I'm ensuring that someone will be there to maintain it, to pay the hosting fees and everything else. It's Greg Wyatt's never going to go away and never. So anyway, I'm putting a coffee cup.

00:17:40:09 - 00:18:04:14

Greg Wyatt

I don't want you guys giving me, you know, cars and your houses and stuff like Del Bigtree is asking for and all of his group of half truth earners and virus promoters . Just a dollar or two. And all this money. All this money. I've never done this before. All this money is going to my assistant now. My assistant is an incredible young guy.

00:18:04:14 - 00:18:28:26

Greg Wyatt

He's 43 years old. I've known him for 15 years. He worked on my computers when he was working for this company, and I developed a great respect for his honesty and tenacity. And he got fired about four months ago by his boss, who is is a crazy guy. He's fully vaccinated, started losing his mind, and I don't know how he stuck with Him.

00:18:29:15 - 00:18:55:27

Greg Wyatt

But anyway, he got a brand new baby. A brand new baby. I'm holding the phone wrong. Sorry, man, he tells me. Hold it horizontally. So as the picture goes, catty, pompous, you know, it's because I can't follow instructions. But I've been that way all my life. I've been a renegade. So anyway, like many of you that follow me and share my stuff, tag people, please.

00:18:56:10 - 00:19:41:21

Greg Wyatt

This is my life. It's for my legacy of my dad's injustice. Weston and Emily's injustice and the injustice that's happening with humanity right now. Please. So anyway, my webmaster had a brand new baby. It was a home birth. Not even registered anywhere. Not registered, no birth certificate, no shots, and born perfectly normal. So anyway, you're supporting him to you know, he he was largely, obviously unemployed and it was an act of God that he came back in my life when I brought it up after a couple of weeks, you know, it was like yesterday he spent 10 hours for minuscule wages.

00:19:42:06 - 00:20:08:03

Greg Wyatt

And I'd like to contribute to this man's life and his wife and his kids. So anyway, enough being said, I went on long enough. Thank you again. I got to get out of this hot tub. I'm heating up and appreciate your support. Again. I love you all more than

you will ever know, period. God bless and have a great day.
